New scalability frontiers in ab-initio MD

Alessandro Curioni
IBM Zurich, Saumerstrasse 4, 8803 Rüschlikon, Switzerland

In this presentation I will give an overview of our recent work to extend the impact and applicability of ab-initio Molecular Dynamics simulations by algorithms re-engineering and their proper mapping to massively parallel machines.
To demonstrate the importance and impact of this work, a recent successful application to the investigation of the complex chemistry of Li-Air battery will be also discussed.
