63rd Sanibel Symposium

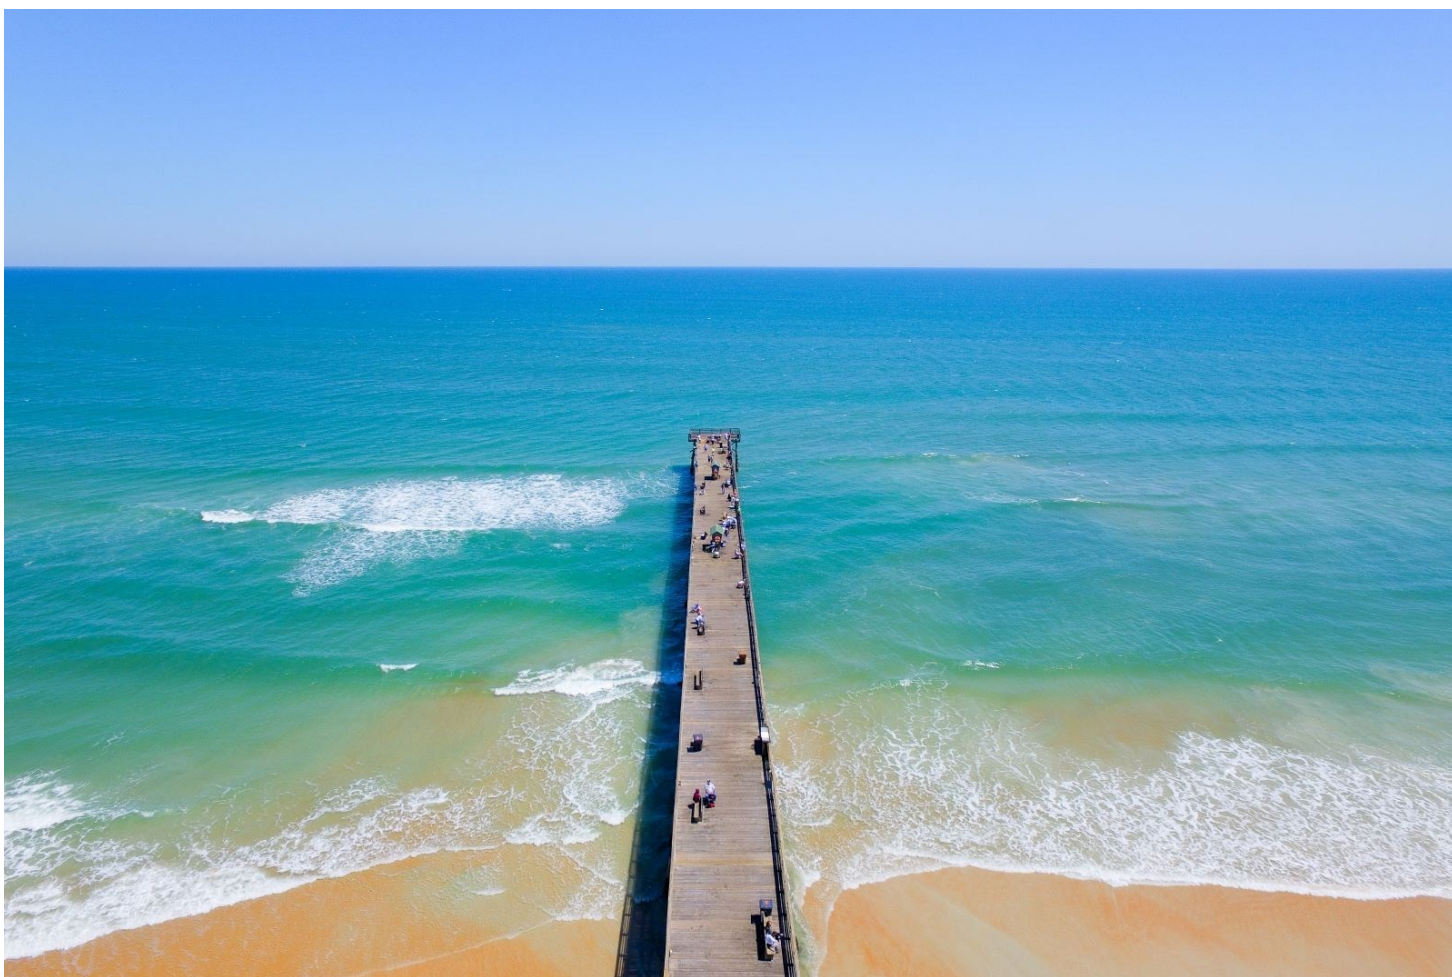

The Theory Meeting for Theoreticians

The Meeting is scheduled for:

St. Augustine Beach, FL

Feb 25- Mar 1, 2024

Now is the time to register for the annual Sanibel Meeting on the topics of quantum theory of atoms, molecules, solids, and biological systems!

In January 1961, a scientific meeting organized by the University of Florida's Quantum Theory Project (QTP) was held on Sanibel Island, Florida. More than sixty years later, that meeting, the "Theory Meeting for Theoreticians", remains the largest annual meeting in the field. The meeting will be held Feb. 25 - Mar 1, 2024, at St. Augustine Beach, Florida. Special sessions include quantum computing and molecular magnetism.

This year's meeting will take the opportunity to address some critical developments that will impact how these fields develop in the future.

Specific topics to be addressed include:

- **Quantum Information and Communication**
- **Theory and Methods for Magnetic Molecules**
- **Theory and Methods for Quantum Materials**
- **Quantum Computing**
- **Molecular Magnetism**
- **Coupled-cluster theory**
- **High Accuracy calculations**
- **Ensemble methods in DFT**
- **Machine Learning**
- **2D Boron Systems**
- **Quantum Dynamics**

The 63rd Sanibel Symposium will be held at the Embassy Suites by Hilton, St. Augustine Beach, Florida. This hotel is located at the beach that adjoins the Anastasia State Park. The locale provides outstanding facilities and has different room types, some of which can be economically shared, a fitness center, a pool, and many other attractive features (see <https://sanibelsymposium.qtp.ufl.edu> for details).

The scientific program will consist of twenty-one sessions with about seventy speakers. Sanibel also offers slots for competitively selected 'hot-topic' oral presentations along with poster sessions. Thus, the meeting makes it possible for all attendees to present their work in whatever way is most comfortable, while benefiting from the unique feedback offered by the Sanibel attendees. The annual Sanibel proceedings published in Molecular Physics provides a permanent record of some of the advances presented. There will also be a special Memorial Session in memory of Professor Joe Paldus, a pioneer in bringing a coupled-cluster to molecular sciences.

Social activities will include a Reception on Sunday night, Feb. 25th, and a banquet on Wednesday, Feb. 28th, with an outstanding after-dinner speaker. This meeting is one of the best investments in the field, with an early fee of only \$599, or \$699 after the deadline of November 30th, 2023. The fee for the meeting includes all social activities, a copy of the program, online access to the abstracts, and the opportunity to present one's results to the expert audience that is characteristic of the Sanibel meetings.

We hope you will join us at the beach in February for this meeting!

Please Register at <https://sanibelsymposium.qtp.ufl.edu/registration/>

Abstract Submission Deadline: **December 22nd 2023**

Award Application Deadline: **December 31st, 2023**
